

# SPECIALIST EOD/IEDD EQUIPMENT NON MAGNETIC TOOL KIT (NMT)

The NMT-EOD 1™ tool kit gives the capability to deal with older unexploded ordnance (UXO) while meeting the challenges of modern and potentially unknown types of weapons and devices.

This comprehensive set of non-magnetic and non-sparking tools provides explosives disposal specialists with a definitive, dependable and versatile equipment resource. Experience has proven that all operators can use this equipment with great confidence.

The NMT-EOD 1™ has been developed in response to the specific requirements of NATO EOD units, and is certified to NATO STANAG 2897 EOD Annex C (NATO Standardization Agreement for Magnetic Signature Design Criteria for EOD Equipment).

## Threat

The legacy of world wars and numerous recent regional conflicts is that EOD teams are frequently exposed to the threat of conventional UXO and weapons containing chemical or biological agents. Older UXO can become more hazardous with age as components deteriorate and explosive fillings decay. Modern weapons invariably have sensitive and complicated firing systems. In all cases a particular threat exists from UXO incorporating magnetic influence systems. For this reason EOD tasks involving magnetically-actuated UXO require special precautions - when manual entry is made into UXO it is essential that all tools and equipment used meet the stringent non-magnetic requirements of NATO STANAG 2897 EOD.

## Non-Sparking

The inherent non-sparking property of NMT-EOD 1™ tools make them suitable for all EOD/IEDD tasks where an external hazard or risk of explosion exists (e.g. close proximity to oil fuel tanks or inside flammable gas-filled compartments).

## Typical Applications

The Non-Magnetic Tool Kit comprises three sub-sets, each of which is available separately. The purpose of each set is outlined below:

1. NMT-EOD Set A™. A general-purpose tool set for generic, non-specific, EOD tasks including mines/munition disposal operations.
2. NMT-EOD Set B™. An additional enhancement to Set A, increasing its capability to include specialized mines/munitions investigation tasks.
3. NMT-EOD Set C™. A lightweight multi-purpose, adjustable pin wrench set for mines/munitions "keep ring" removal and similar tasks.

Item	Description	NSN
NMT-EOD1™	Comprehensive Non-Magnetic Tool Kit™ (comprises NMT-EOD Set A, B and C)	
NMT-EOD Set A™	General-purpose tool set	1385-99-682-6358
NMT-EOD Set B™	Munitions investigation enhancement tool set	1385-99-670-9493
NMT-EOD Set C™	Multi-purpose, adjustable pin-wrench set	1385-99-676-4054

## SUMMARY

- Users** EOD and IEDD Technicians
- Function** Comprehensive set of non-magnetic and non-sparking tools
- Threat** The inherent non-sparking property of NMT-EOD 1™ tools make them suitable for all EOD/IEDD tasks where an external hazard or risk of explosion exists
- Advantage** Capability to deal with older unexploded ordnance (UXO) while meeting the challenges of modern and potentially unknown types of weapons and devices

All NMT-EOD tools and cases are NSN codified
