BOMBTEC™

TC 1080 TELESCOPIC CAMERA

The BombTec TC 1080 Telescopic Camera provides the ability to visually search and capture imagery of areas that are difficult to reach or see into. The system includes a high resolution video camera and an Android device to display the live image, and record photos and video.

The TC 1080 is ideal for searching for hidden threats, suspicious objects, contraband, drugs, and other targets. Its powerful lights illuminate dark areas, such as under vehicles, above ceiling tiles, and tunnels/culverts.

This lightweight system is ideal for:

- Vehicle Checkpoints
- VIP Security
- Building Search
- Port Security
- Military Operations
- Public Safety
- Explosive Threat Search

TC 1080 TELESCOPIC CAMERA

CAMERA ROTATION

The TC 1080 has two main parts: a handle with the Android device, and a rotating telescopic pole. This enables the operator to easily use their free hand to rotate the pole 90° to the left and 180° to the right (270° in total) to search a wide field of view, while they remain stationary. This allows the user to focus on searching, and minimizes the need to rotate body position.

UP IS ALWAYS UP

The TC 1080 can be set to always display the horizon at the bottom of the Android screen, even as the user rotates the camera head. This alleviates the user from having to twist their head to make sense of what they're seeing.

EXCELLENT REACH

The telescopic pole measures just over 3m (10'), and can be extended or retracted to the desired length, without any tools.

TC 1080 TELESCOPIC CAMERA

ERGONOMIC HANDLE

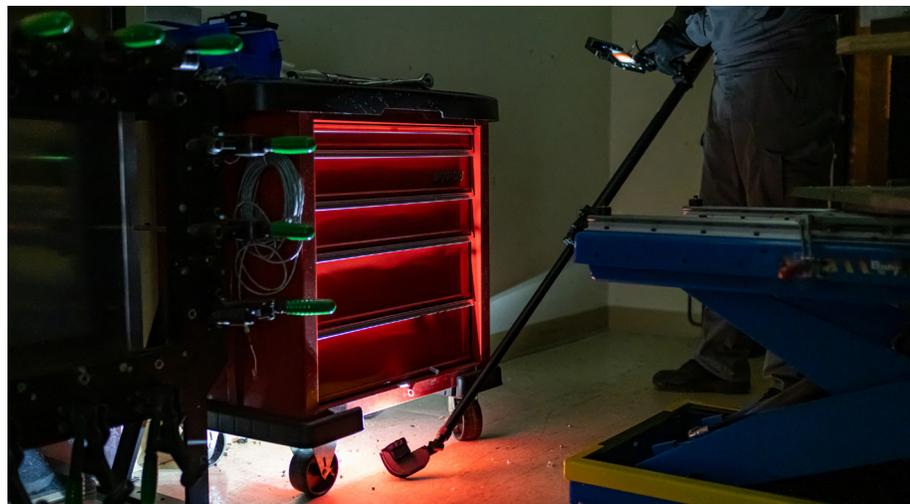

The pistol grip and forearm cradle form a natural handle. The system can be comfortably held in either the left or right hand. The Android device screen can be easily rotated and locked into a preferred position.

LIGHTWEIGHT

The TC 1080 is remarkably lightweight and can easily be held by the user in one hand and aimed in a controlled manner.

RECORD IMAGERY, HD VIDEO AND AUDIO

The camera records imagery and High Definition video at 1080 resolution for investigative and criminal evidence purposes.

ILLUMINATE DARK SPACES

The camera head has an integrated lighting system for use in dark spaces, such as under a vehicle, in a culvert, inside a shipping container or under furniture.

TC 1080 TELESCOPIC CAMERA

SINGLE INTEGRATED POWER SUPPLY

The camera is conveniently powered by the Android device battery for up to 4 hours of nominal run time on a single charge.

WEATHER RESISTANT

The system is rugged and can be used in rainy and snowy conditions, as well as in hot and cold situations.

EASE OF USE

The TC 1080 requires no tools to set up and adjust, and works equally well for right or left handed users. No formal training is required to use the system and benefit from the app.

CUSTOMIZED APP

The TC 1080 Android device includes an app that enables the user to record imagery and video, adjust the lights, set the horizon, and other features.

PORTABILITY

The TC 1080 includes a rugged case that is easily stored in a compact response vehicle.
